

ForaCare Suisse Showcases Products at the 42nd National Congress on Diabetes in Romania

FORA® Diamond Blood Glucose Monitors highlighted at the Romanian Federation of Diabetes conference.

BRASOV, Romania, May 25th, 2016 /PRNewswire/ — More than 800 physicians attended the 42nd National Congress of the Romanian Society of Diabetes, Nutrition and Metabolic Diseases in Brasov. During the four-day conference, ForaCare Suisse AG, located in St. Gallen, Switzerland, showcased its [FORA® Diamond Blood Glucose Monitoring systems](#) that are validated to meet the ISO 15197 requirements.

“We are proud to share the benefits of the FORA® Diamond line, our [FORA® P30 Plus blood pressure monitors](#), and our achieving [ISO 15197 validation](#),” said Ty-Minh Tan, CEO of ForaCare Suisse AG. “Our goal in supporting events like the 42nd National Congress in Romania is to promote awareness of our product line, and how self-monitoring and improved patient compliance results in better management of diabetes and hypertension.”

More than 300 physicians signed up for FORA product coupons and additional information about the entire FORA line of blood glucose and blood pressure monitoring systems.

A similar event celebrating World Health Day, April 7, was held in Bucharest on April 8 to share news about Diabetes Mellitus therapies. More than 300 physicians and medical researchers participated. Information on FORA products was shared with attendees.

About FORA devices:

All ForaCare monitoring devices are validated as highly accurate in the industry and provide superior quality directly to consumers. FORA Blood Glucose Monitors are validated according to ISO 15197 requirements at an internationally renowned diabetes institute in Ulm, Germany.

Fora Care devices comply with new ISO standards and have completed third party validations:

- FORA® Diamond strips (for the Diamond series) are clinically validated in Czech and Switzerland and are proven to meet the +/- 15% required by the [new ISO 15197:2013](#).
- [FORA® Comfort pro GD40](#) (with 5-electrode technology) is clinically validated in Switzerland and is proven to meet the +/- 15% required by the new ISO 15197:2013

ForaCare provides FDA cleared and CE marked innovative health monitoring devices that provide simple connection to the FORA system. For more information, please visit www.foracare.ch/
